

Introductory Biostatistics

Understanding and reporting research results including P-Values and Confidence intervals

Friday, 23 February 12:30 – 1:30PM

Need a starter on statistics or a refresher? This seminar covers fundamental statistical concepts for clinical researchers and research students including:

- why we use significance testing;
- how to interpret confidence intervals and p-values;
- how to sample size and variability affect results;
- why bias and confounding factors are important considerations in designing studies, and when to seek statistical support.

Doctor Julie Marsh

Julie is an experienced statistical consultant who has worked in the Pharmaceutical industry for many years before retuning to academia.

She teaches statistics at UWA and is a Senior Research Fellow at the Telethon Kids Institute.
